

The **ONLY** Integrated Orthopedic EHR Software Suite

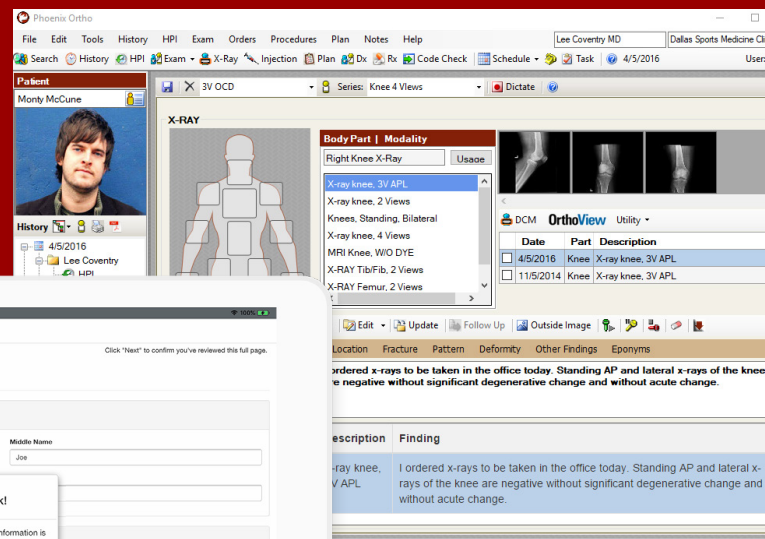

Why Phoenix Ortho?

Orthopedic physicians and practices have different needs from primary care doctors. However, most Electronic Health Records (EHR) solutions force orthopedic doctors to sift through menus and reports meant for every other specialization—wasting valuable time and mouse clicks.

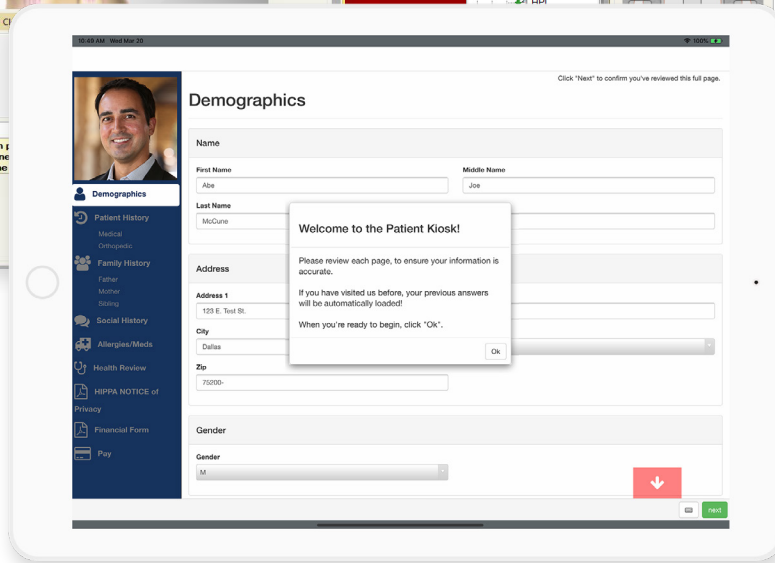

Phoenix Ortho is an EHR software suite developed for orthopedic medicine. Every part of this integrated software suite is designed to help orthopedic surgeons save time, eliminate clinic bottlenecks, and improve cash flow.

Patient Kiosk

What Does Phoenix Ortho Do?

EHR with Provider Customization Reduces Mouse Clicks and Saves Time

You can customize the EHR with templates for your charting to save time.

PACS and Streamlined Image Workflow Integrated in the EHR

A wholly-integrated PACS solution helps eliminate data entry errors in image orders.

PM/Clearinghouse Integration that Saves Time and Increases Cash Flow

Phoenix Ortho's integrated PM solution has a built-in electronic clearinghouse for faster claims.

Phoenix Kiosk - Tablet-Based Patient Intake App

Eliminate paper scanning and other front-office bottlenecks with a tablet-based app for patient check-ins.

iPhax AI Automates eFax Workflow, Saving up to 75% on Labor Costs

Eliminate manual processes in your inbound and outbound eFax management using AI automation.

PT/OT Developed by Phoenix Ortho Automates 8-Minute Rule & Simplifies MIPS

Simplified PT/OT Time-based billing calculations & automated merit-based incentive reporting.

With Phoenix Ortho EHR You:

Spend less time sorting through paperwork and menus meant for other specializations.

Save labor on paperwork throughout the whole practice by eliminating redundant forms.

Improve patient engagement with online patient portals and streamlined intake processes.

Improve cash flow with an integrated clearinghouse and no EDI fees.

No Hidden Fees

With Phoenix Ortho, you don't have to worry about hidden costs for initial implementation, customer training, software updates, electronic data interchange transactions, claim submissions, or other ongoing support initiatives. All of these costs are included in the cost of the software.

Unparalleled Support

Our implementation specialists and support staff have extensive experience helping orthopedic practices of all sizes make the most out of Phoenix Ortho's EHR software suite. These trainers have experience with orthopedic medicine that will help your clinic smoothly integrate the EHR so you can save time and energy.
