

Take Your Orthopedic Practice Software on the Go

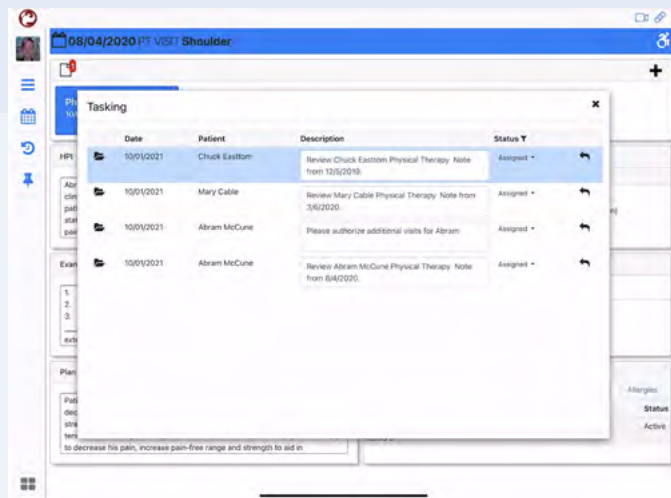

phoenixGO

phoenixortho iPad and browser access

What Is PhoenixGO?

PhoenixGO is our new orthopedic-exclusive web-based solution that runs on iPad or browser to give you access to your Phoenix Ortho software solutions remotely. This adds more speed and convenience to your orthopedic practice since you can access important documentation from wherever you have internet access.

PhoenixGO - Tasking

The PhoenixGO platform includes one-page form documentation for:

Telemedicine.

Provide remote services via Phoenix InTeleMed and PhoenixGO integration.

Follow Up Visits.

Review important documents for patient follow-up visits on the go.

Physical Therapy.

Simplify PT visits and documentation with a mobile solution.

Browser Based Imaging.

Manage medical x-rays right from your iPad or laptop.

Why Use PhoenixGO?

Convenience.

Make managing your practice easier with remote access to your most important documentation.

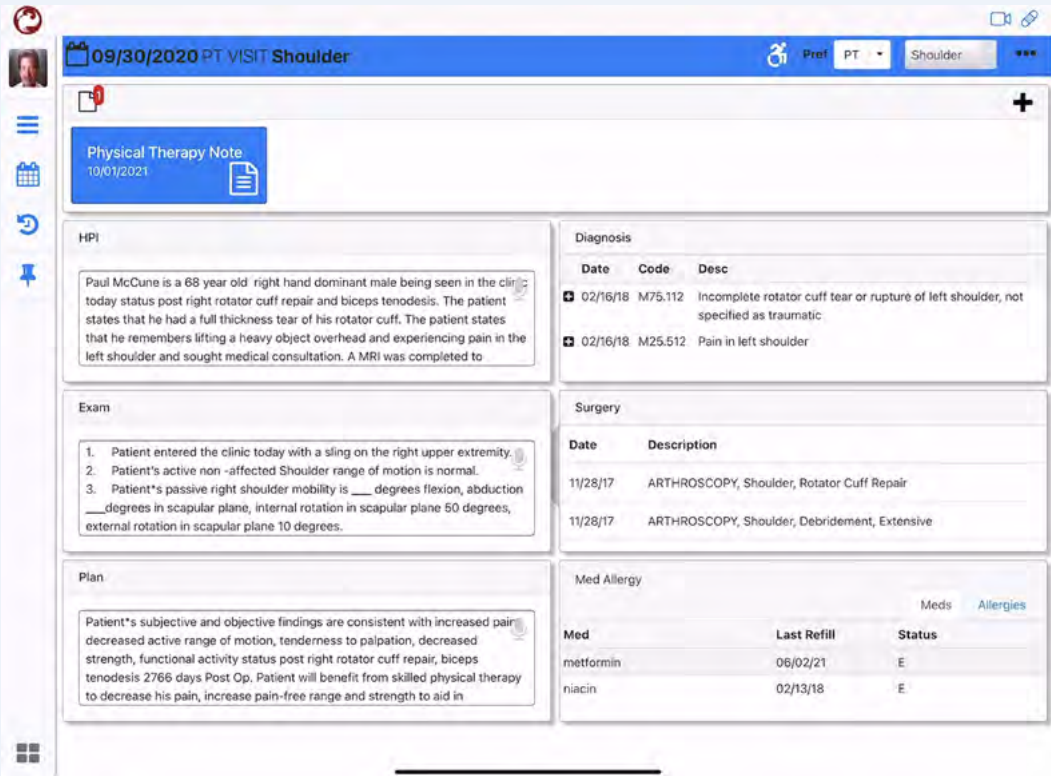

Speed.

Respond immediately to requests from your clinic staff wherever you are.

Accessibility.

In addition to MVVM data-binding tech, our JavaScript tools allow real-time push data syncing to improve data accessibility.

PhoenixGO - PT Board

PhoenixGO is Available Now!

Contact Phoenix Ortho today to discover how you can integrate this mobile solution with your orthopedic workflows!
